

SOUMYAJIT NAG

Software Developer | Python Programmer | AI Support Specialist

Kolkata, West Bengal, India | [8250597771](tel:8250597771) | soumyajitnag2026@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

MCA graduate with hands-on experience in full-stack web development and Python-based application development. Built projects involving AI-powered healthcare solutions, machine learning, and responsive web applications using React, Node.js, Express.js, MongoDB, Python, and Streamlit. Familiar with REST APIs, authentication, database design, and modern development tools. Eager to contribute as an entry-level Software Developer, Python Developer, or Full-Stack Developer while continuously learning and building scalable applications.

TECHNICAL SKILLS

Programming: Python, JavaScript, HTML, CSS, JSON

Frontend: React, Next, Tailwind CSS

Backend: Node, Express, REST API Development, JSON Web Token

Databases: MongoDB, SQL Basics

Salesforce: Salesforce CRM Basics, Apex Basics, SOQL Basics, Objects and Fields, Workflow Concepts

Tools and Platforms: Git, GitHub, VS Code, Postman, Streamlit

Security: Token Authentication, Password Hashing, Access Control, Input Validation

CORE COMPETENCIES

Software Development Life Cycle, Object-Oriented Programming, Data Structures, Algorithms, Database Design, API Testing, Debugging, Requirements Documentation, Problem Solving, Team Collaboration

PROJECTS

Healthcare AI Platform

Technologies: React, Next, Node, Express, MongoDB

Authentication, Tailwind CSS - Built 3 healthcare modules: chatbot, prescription analyzer, and symptom prediction workflow.

- Protected accounts with token-based login, password hashing, permission checks, and guarded routes.
- Connected 2 model services for medical document analysis and conversational health support.
- Designed 5+ service workflows for user management, medical records, file uploads, multilingual support, and patient information.
- Managed document schemas for patient records and prepared adaptive pages for desktop and mobile use.

Salary Prediction System

Technologies: Python, Pandas, Machine Learning, Random Forest Regression, Streamlit

- Created a 4-stage analytics pipeline covering cleaning, feature preparation, training, and prediction output.
- Analyzed structured compensation records with Pandas and prepared variables for regression-based estimates.
- Trained and tuned a Random Forest algorithm for more consistent salary predictions.
- Published a Streamlit interface that returns real-time estimates from user inputs

Personal Portfolio Website

Technologies: Web Standards, JavaScript, GitHub Pages

- Launched a portfolio website with 4 core sections: projects, skills, education, and contact information.
- Created mobile-friendly layouts, clear navigation, and browser-compatible pages using semantic markup, styling rules, and JavaScript.
- Improved page structure, readability, and accessibility basics for recruiter review.

EDUCATION

Master of Computer Applications (MCA) - Narula Institute of Technology | Completed 2026 | CGPA: 7.69

Bachelor of Computer Applications (BCA) - University of Burdwan | Completed 2024 | Percentage: 65.44%

Higher Secondary - WBCHSE | Completed 2021 | Percentage: 70%

CERTIFICATIONS

- Oracle Cloud Infrastructure 2025 Certified Generative AI Professional - Oracle
- The Business Intelligence Analyst Course 2026 - Udemy | Instructor: 365 Careers | Completed: 11 May 2026

CAREER FOCUS

Junior Software Developer, Full Stack Developer, Python Developer, Salesforce Trainee

LANGUAGES

English: Professional | Hindi: Fluent | Bengali: Native
